

90% High-Efficiency Gas Furnace

BUILT

EXCLUSIVELY

FOR

MANUFACTURED

HOMES

Finally a 90% High-Efficiency Gas Furnace to fit your Manufactured Home.

Today, the manufactured home is a sophisticated, affordable home that is a smart choice for many buyers. Equally smart is knowing that your manufactured home furnace is just that — a *manufactured home* furnace. Specifically designed for your manufactured home, an Intertherm 90% AFUE gas furnace offers high efficiency and system dependability. This is the only 90% high-efficiency furnace that will exactly fit in the space occupied by your current furnace, which could have an efficiency rating as low as 65%.

The more you learn about our manufacturing process, the more you'll see that no other heating and cooling manufacturer compares to Intertherm's product quality — quality made possible through Demand Flow Technology™. While other companies test products at random, we use 100% computer-automated testing on every Intertherm product to eliminate human error in the final analysis of product quality. We are the only heating and cooling manufacturer to be DFT certified.

Intertherm is a household name in the manufactured housing industry, with over 75 years of experience. Given our history and dedication to the manufactured housing industry, it is easy to see why most new manufactured homes are built with our heating systems, and when applicable, are equipped with our cooling systems too. You can rely on your Intertherm expert to make your home more comfortable with AireCare electronic air filters, digital thermostats and other manufactured home accessories.

It's a comfort to know that Intertherm is made for your manufactured home, and it's a comfort you can feel.

Features & Benefits

- The only 90% high-efficiency gas furnace to fit the manufactured housing industry standard space.
- Proven components ensure high quality and dependability.
- Our dependable, shock-mounted hot surface ignitor has a 20 year history of reliability.
- Integrated circuit board features diagnostic indicators and an adaptive ignitor warm-up time to prolong ignitor life.
- Heavy-gauge aluminized steel primary heat exchanger and stainless steel secondary heat exchanger ensures long life and efficiency.
- High efficiency rating enhances your Energy Star home.
- Available in downflow models, which can be installed in a utility room, enclosed closet or alcove.
- All models are A/C ready up to 4 ton capacity.
- The blower off delay increases cooling performance when matched with an Intertherm cooling system.
- Fully insulated cabinet ensures minimized heat loss and quiet operation.
- 100% fired and tested — All units and each component (both mechanical and electrical) are tested on the manufacturing line.
- Also approved for modular homes/buildings.
- One-year standard limited parts warranty.

Extended protection plans are also available. Ask your contractor for specific details on warranties and consumer financing programs.
