

## General Information

Dryline<sup>™</sup> Sheathing Tape is an aggressive joint sealing tape well suited for reducing air infiltration through wall systems. Dryline<sup>™</sup> Sheathing Tape is compatible with most housewraps and poly-faced sheathing materials.

Another in the DryLine<sup>™</sup> family of weatherization tools for the home.

Roll Size 1 7/8" x 55 yards  
Rolls/Case 16

## Installation Guidelines

Ensure that the wall substrate is flat and free of dust or moisture before DryLine<sup>™</sup> Sheathing Tape is applied. DryLine<sup>™</sup> Sheathing Tape has excellent cold weather adhesion and may be applied down to 10° F (12° C).

Apply Dryline<sup>™</sup> Sheathing Tape using firm, uniform pressure.

Dryline<sup>™</sup> Sheathing Tape must be covered within 90 days of initial application.
