

Our most popular access door, redefined.

Small changes with big results.

Nystrom has manufactured premium access doors for over 60 years, delivered directly to the job site. Today, we continue to lead the marketplace with an update to our most popular line of access doors.

The Nystrom Architectural Access Door now features a pan door design, adding strength and durability; an Anti-Flex Frame, protecting your door from irregularities in the wall; and Easy Install Tabs, drastically reducing installation time for drywall applications. The Architectural Door is ideal for architectural specification.

- ✓ Stronger body.
- ✓ Anti-flex frame.
- ✓ Faster to install.

1

Interchangeable door

No matter how your frame was installed, engage two button snap hinges to rotate the door to any orientation you need.

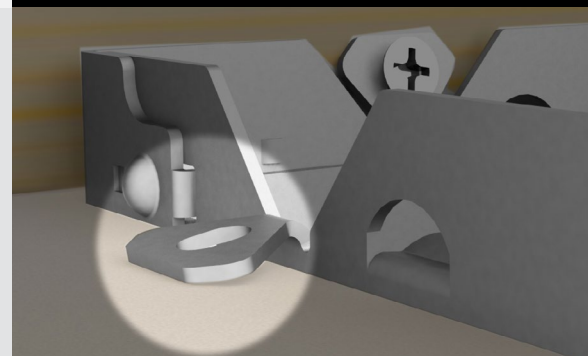

2

Anti-flex frame

Screws are inserted through our patent-pending Easy Install Tabs, firmly fitting the door to the wall without flexing the frame.

3

Painless installation

When mounting screws are not required, quickly and easily install your new panel by bending our patent-pending Easy Install Tabs over the drywall.
